

I am the director of a group of biostatisticians & data managers with Beckman Coulter corporation in Miami. Beckman Coulter is a global company that develops and manufactures diagnostic medical devices. My team is mainly (but not exclusively) involved in clinical trials and my staff is located at different locations in US and outside US.

We are continuously looking to hire biostatisticians but unfortunately, so far we have not been able to attract talents from the University of Florida. I think it is imperative for us to work with UF because of the value that of its programs. Actually, my daughter received a degrees from UF that is helping her tremendously in her career.

The purpose of this message is to establish contacts with the Department of Biostatistics at UF and explore opportunities for talent recruitment. Beckman Coulter is a very reputable company and provides competitive benefits and development opportunities for its employees. We currently have three openings for biostatisticians in Miami, Boston area, and Chaska (Minnesota).

Looking forward to your response.

Best regards,

Robert Magari, Ph.D.
Global Director of Biostatistics & Data Management
