

Assistant, Associate, or Full Professor of Biostatistics

Department of Preventive Medicine Keck School of Medicine University of Southern California

The Department of Preventive Medicine of the University of Southern California invites applications for a clinical track faculty position at the Assistant, Associate, or Full Professor level in biostatistics. A suitable candidate is required to hold a PhD in biostatistics, or a related field. Candidates should have a demonstrated track record of methodological and applied interdisciplinary research, and interest in working with clinical and basic science investigators focused on investigations in children and young adults with cancer.

The successful applicant will devote their effort to biostatistical and research design functions of the Children's Oncology Group (COG). Major clinical and translational research efforts at COG involve investigations into the biology, treatment, epidemiology, and late adverse outcomes associated with cancers of children and young adults. Through COG, the successful applicant will have the opportunity to interact with a large network of clinical investigators, basic scientists, epidemiologists and statisticians working in childhood cancer research.

Potential candidates are encouraged to submit their applications (along with current CV, statement of research interests, and two or more letters of recommendation) to:

Todd Alonzo, PhD
Professor of Research
University of Southern California
Children's Oncology Group
222 East Huntington Dr., Suite 100,
Monrovia, CA 91016
Email: talonzo@childrensoncologygroup.org

USC values diversity and is committed to equal opportunity in employment. Women and men, and members of all racial and ethnic groups are encouraged to apply.
